## The Carpentries

Manchester, UK

### INSTRUCTOR

July 2020 - present

- Software, Data, and Library Carpentry (The Carpentries) are programs of The Carpentries (a fiscally sponsored project of Community Initiatives).
- The Carpentries Instructors are volunteers who teach foundational computational and data skills to researchers, e.g., programming basics in R and Python, use of the command line, and version control.
- Housed on GitHub, all Carpentries? lessons are open source, with an open contribution model, and lessons are collaboratively created and maintained by volunteers. Lessons are taught by Instructors in two-day workshops.
- Developed my teaching abilities, both through the Instructor training course I attended to certify as an Instructor and through regular teaching.
- Volunteered my time to help teach others computing skills because I believe in the importance of these skills to foster research.
- Deepened my understanding of equity and inclusion principles through The Carpentries ethos and Code of Conduct.
